1. Introduction

As part of WILDFOOD deliverable D3.2, this document maps key stakeholders from Tunisia, Spain, Portugal, Italy and Slovenia, working on Aromatic and Medicinal plants, Acorns, Truffles and Pine Nuts. The main aim of this study is to connect local producers and enterprises to their consumers and to the global market. The database includes key stakeholders who start collaborating with WILDFOOD team at the beginning of the project. The list consists of local producers and small enterprises collecting or valorizing target products of WILDFOOD. The database will contribute to set up a virtual platform to help local stakeholders to present themselves and their products to the international market in an innovative way. In overall, the database will support the local food supply chains with a new way for economic and social sustainability, showing the importance of local producers. Besides, the platform, which emphasizes sustainability and promotes short supply chains around the Mediterranean, shows an innovative way of representation and communication bringing producers closer to people interested in their products. The list was elaborated and published after the approval of all the named producers and they have accepted to publish information such as their names, websites, countries, certification, and their position in the value chain.

The published information was agreed with different partners after a survey launched on March 16th, 2022. The survey was launched to choose the information that will be published and obtain stakeholders permission to ensure data protection. 10 participants to the survey confirmed the choice with at least one partner per institute/country.

2. Description

The present list contains 65 key stakeholders from 5 Mediterranean countries and working on the 4 Wild food products chosen within the framework of the project: Pine nuts, Truffles, Aromatic and Medicinal Plants and Acorns. Table 1 shows that the largest number of key stakeholders (28) are working on Pine nuts with 12 stakeholders from Spain, 10 from Tunisia, 4 from Portugal and 2 from Italy. Followed by AMP with 16 stakeholders from Tunisia (10) and Portugal (6) and Truffles with 14 stakeholders from Spain (8), Italy (4) and Slovenia (2). Only 7 stakeholders, from Portugal, working on Acorns are involved in the key stakeholders list.

Table 1. Distribution of key stakeholders according by product and country

	Pine nuts	Truffles	AMP	Acorn	Total
Tunisia	10	0	10	0	20
Spain	12	8	0	0	20
Slovenia	0	2	0	0	2
Italy	2	4	6	0	12
Portugal	4	0	0	7	11
Total	28	14	16	7	65

Three main categories of economic actors are found in the list of key stakeholders: Producers, Wholesalers and Retailers. The first category of producers, including also collectors and processors in table 2, is the most represented category in the list with 53 stakeholders representing all the involved countries and for all the considered Wild food products. A second category including stakeholders that are at the same time producers and retailers is represented in Portugal for both products Acorns and AMP and in Spain for Truffles.

The only Wholesalers represented in the stakeholders list are Truffles wholesalers in Italy and Spain.

Table 2. ~~Error! No se encuentra el origen de la referencia.~~ Distribution of key stakeholders by category in the supply chain

	Producer/Collector/Processor	Producer/Collector/Processor - Retailer	Wholesaler	Total
Italy	3		3	6
Pine nuts	2			2
Truffles	1		3	4
Portugal	11	6		17
Acorn	6	1		7
AMP	1	5		6
Pine nuts	4			4
Slovenia	2			2
Truffles	2			2
Spain	17	1	2	20
Pine nuts	12			12
Truffles	5	1	2	8
Tunisia	20			20
AMP	10			10
Pine nuts	10			10
Total	53	7	5	65

A crucial information on the key stakeholder's certification is present in the list. From 65 stakeholders, 30% are certified.

Table 3 shows that Portuguese stakeholders are the most certified stakeholders with 4 certifications for AMP, 4 for Acorns and 3 for Pine nuts. Also 6 stakeholders from Spain (2 working on Truffles and 4 working on Pine Nuts), and 2 stakeholders from Italy working on Truffles are certified. No stakeholders from Tunisia and Slovenia are certified.

Table 3. Number of certified key stakeholders by product and by country

	Organic product	ISO 220000	ISO 9000	IFS	BRC	Total
Acorn						4
Portugal						4
AMP	4	1				4
Portugal	4	1				4
Pine nuts	4	4	2			7
Spain	2	4	2			4
Truffles	1			2	2	4
Italy	1			2	2	2
Total	9	5	2	2	2	19

“Organic Product” is the most applied certification by 9 stakeholders, used in Portugal for AMP, In Spain for Pine nuts and in Italy for truffle. Followed by “ISO 22000”, applied by 5 stakeholders in Spain for Pine nuts and in Portugal for AMP. Certification “ISO 9000”, “IFS” and “BRC” are applied by 2 stakeholders each for Pine Nuts and truffles in Spain and Italy. Other certification types such as “Food safety”, “Eco”, “Plant Propagation”, “FSC”, “Global GAP” and “Km0 Alentejo” are also applied by stakeholders as shown in Table 4.

Table 4. Types of certification by product and by country

	Organic product	ISO 22000	ISO 9000	IFS	BRC	Plant Propagation	FSC	Global GAP	Km Alentejo	Food safety	Eco	Total
Acorn						1			1			4
Portugal						1			1			4
AMP	4	1						1				4
Portugal	4	1						1				4
Pine nuts	4	4	2				1					7
Spain	2	4	2									4
Portugal							1					1
Truffles	1			2	2					1	1	4
Italy	1			2	2							2
Spain										1	1	2
Total	9	5	2	2	2	1	1	1	1	1	1	19

Table 5. presents the full list of key stakeholders with the previously described data. This list will also be converted into a map of key stakeholders.

3. Conclusion

The present report is the deliverable D3.2 of the Wildfood project, presenting the list of key stakeholders and a description of its content. Stakeholders mapping is an important phase to set up a representative map of key producers to be published on the most frequented websites in each country around the Mediterranean. The producers map will ensure better visibility for small firms and improve their chances of accessing to the international market. This task will fully contribute to the creation of a map of key stakeholders based on the current list.

The Partnership for Research and Innovation in the Mediterranean Area will devise new R&I approaches to improve water availability and sustainable agriculture production in a region heavily distressed by climate change, urbanisation and population growth.

The PRIMA programme is an Art.185 initiative supported and funded under Horizon 2020, the European Union's Framework Programme for Research and Innovation.
